ONYX

Onyx Stone

Onyx stone is one of the most beautiful and luxurious natural building stones. Iran has many onyx ore mines.

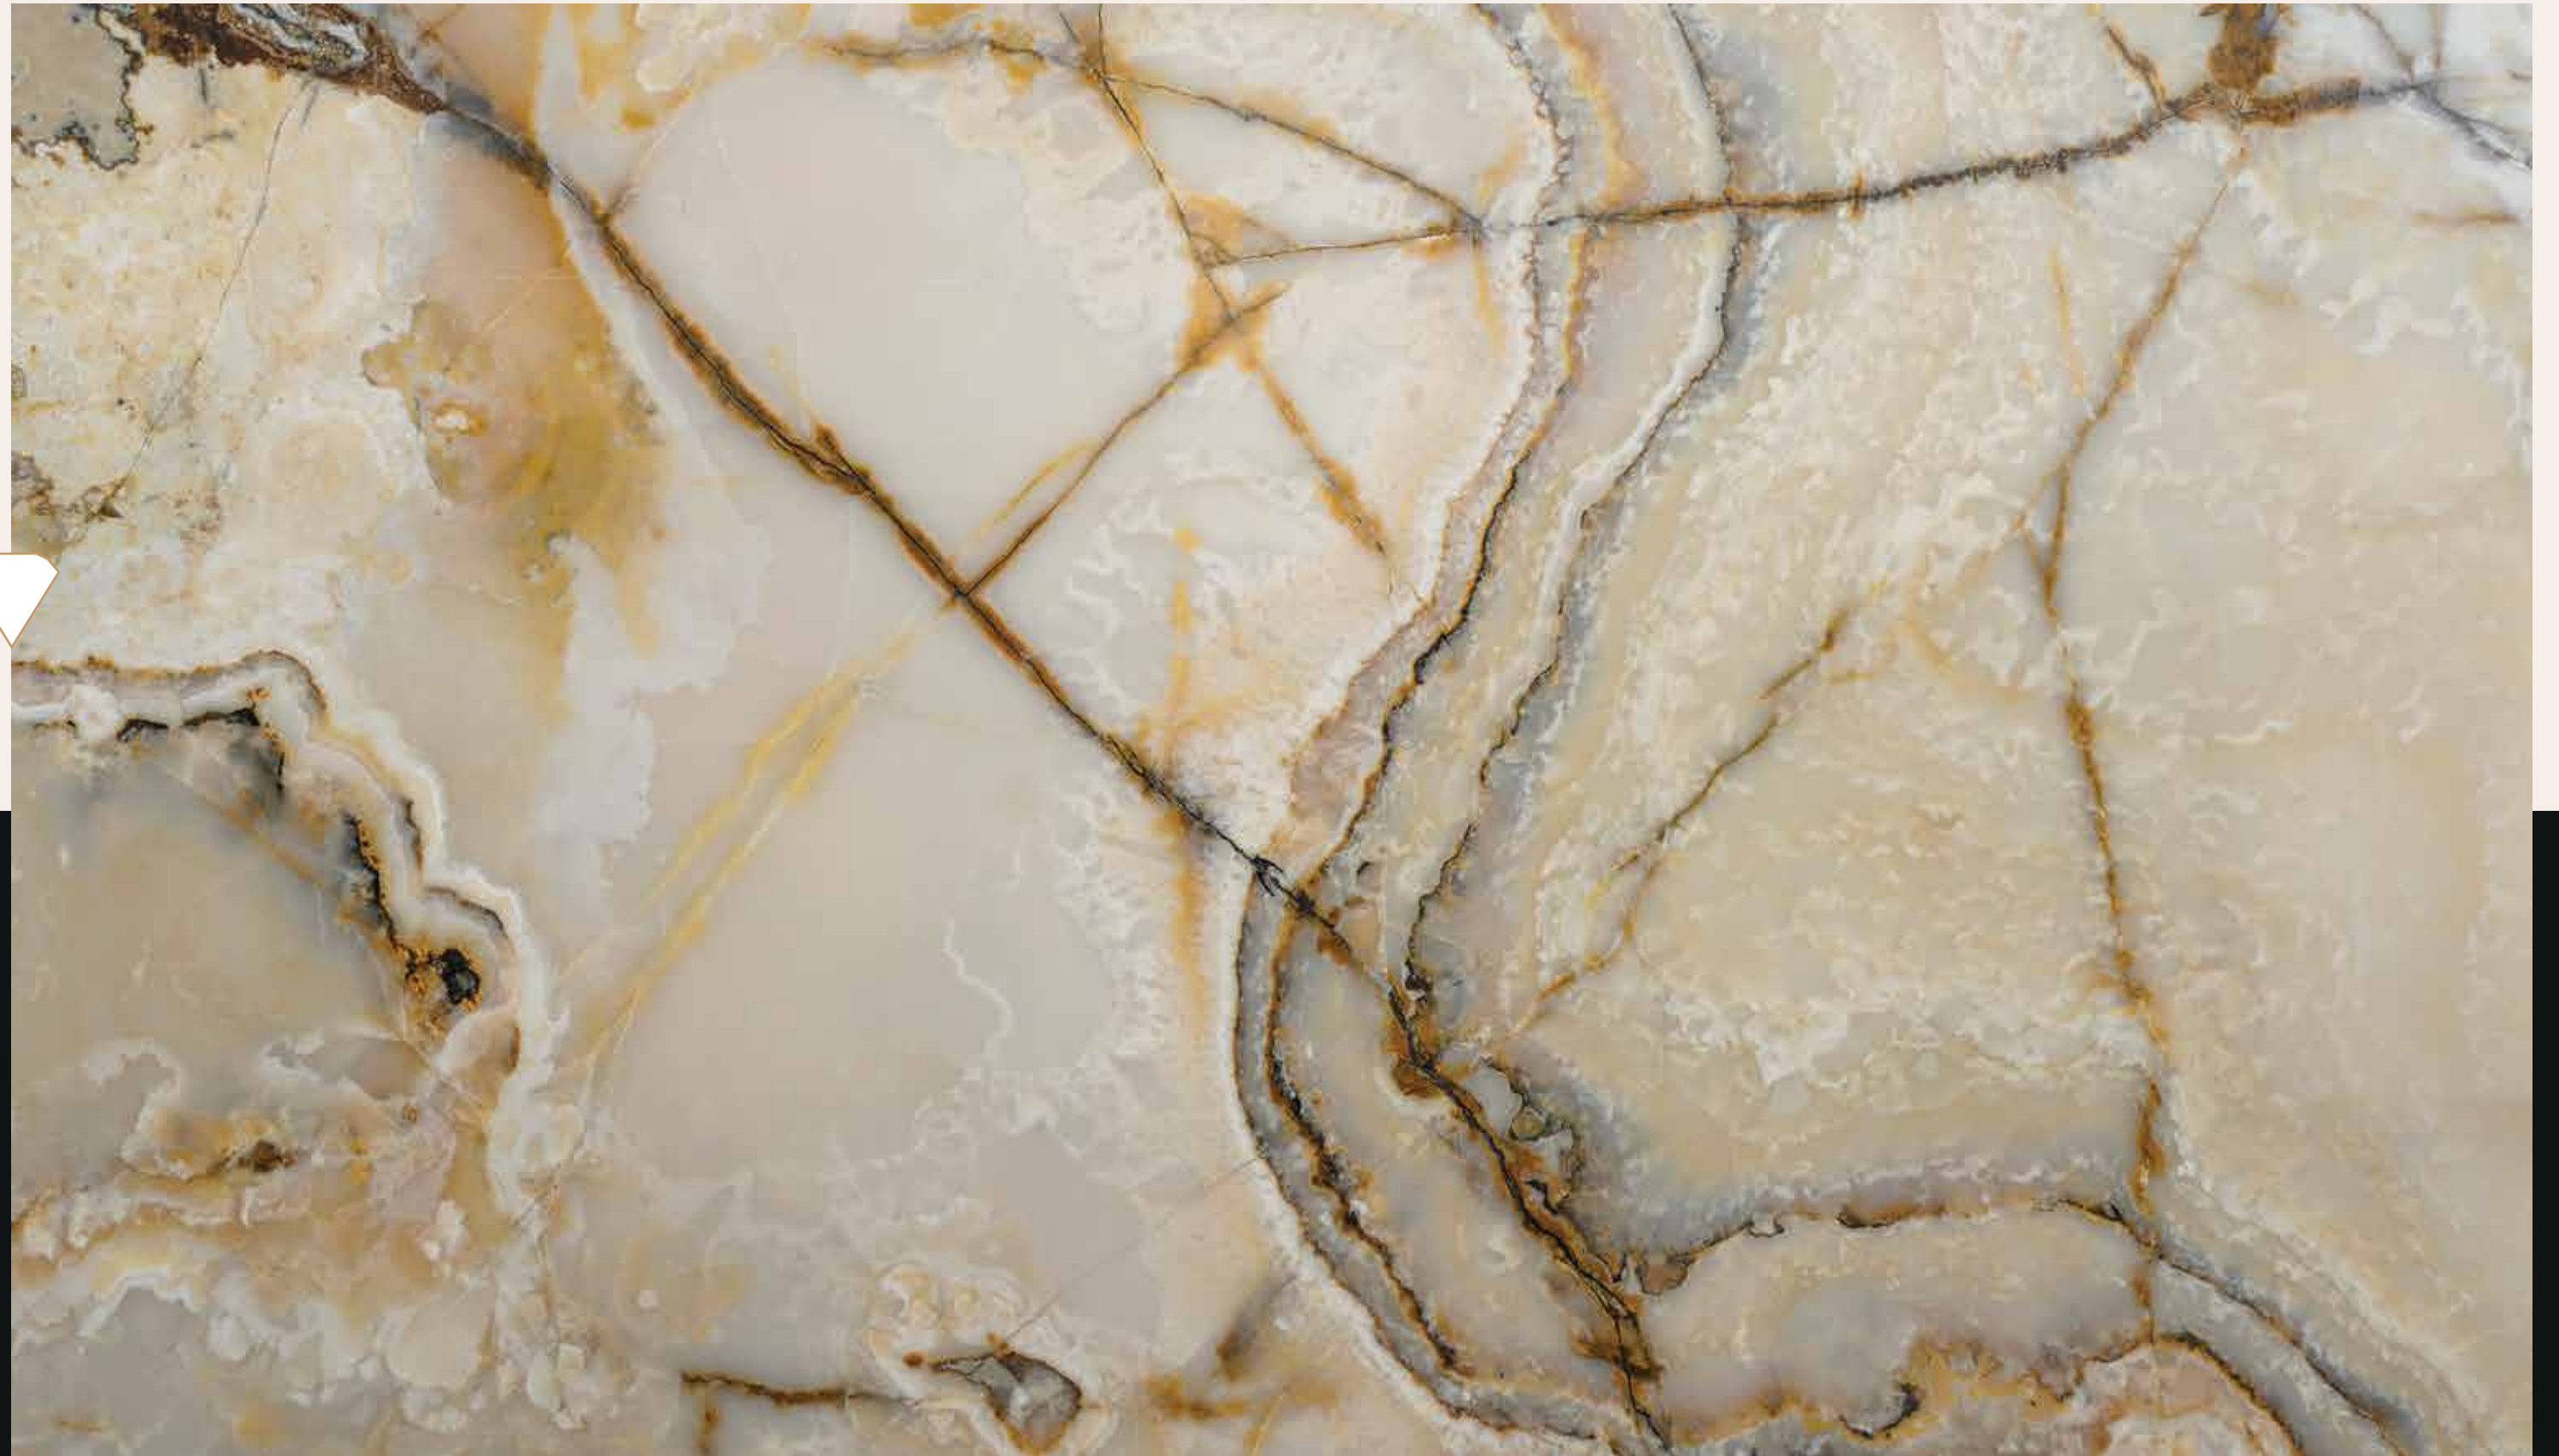

Also, onyxes are the only group of building stones that, with a few exceptions, transmit light which gives very special and unique beauty to the spaces and creates peace in the environment.

Our products in Onyx are only in the form of slabs and are delivered according to the customer's order with thicknesses of 20 and 30 mm.

The length and width of the slabs depend on the dimensions and quality of the blocks extracted from the mine.
